Essential Interior Timber Design Seminar

This free seminar will explore how timber may be used in interior applications. Presentations include those responsible for winning projects in the interior categories of the 2013 Australian Timber Design Awards (ATDA), experts on timber flooring, interior finishes, and veneers as well as Green Star interiors and healthy buildings.

The seminar is a must for interior design professionals including architects, interior designers, building designers and other building and design professionals.

THE SPEAKERS

Conrad Johnston - Director, Fox Johnston

Established with Emili Fox in 2004 and working on a range of residential, multi-residential as well as public/commercial projects Fox Johnston have been selected by Wallpaper's Architects Directory 2013 as one of the top 20 young architectural talents globally. They have won multiple architectural and timber design awards.

Mel Vatala – Fino Joinery

Mel established Fino some 25 years ago as a quality detailed joinery manufacturer. He is a cabinetmaker with a background in architecture and has been involved in many high profile interior projects involving timber products and special finishes.

Anthony Privitelli – Cabot's Premium Woodcare

Cabot's manufacture a comprehensive range of timber stains, varnishes, clear finishes, oils, paints and polishes for the protection and beautification of timber. Anthony is an engineer with 11 years experience within the coatings industry.

Malcolm Johnston - Hurford Hardwood

Malcolm has extensive experience in the hardwood flooring industry having been involved in production and marketing of hardwood timber and timber flooring or the last 15 years.

Andy Marlow - Architect, Cox Architects

Andy is a Green Star Accredited Professional, Co-Chair of the Australian Institute of Architects NSW Sustainability Committee and sits on the Property Council of Australia Sustainable Development Committee.

Juel Briggs – Director, Briggs Veneer

Briggs Veneers is a fourth generation family business. Juel is an Industrial/Physical Chemist with a passion for providing the best possible products and information to assist architects and designers in reaching their design objectives (and dreams!).

Stephen Mitchell - Technical & Environment, WoodSolutions NSW & ACT

Stephen has been with the timber industry for 8 years and undertakes environmental projects in recycling and life cycle assessment as well as technical education for specifiers.
